

New Student Starter Toolbox

1

SUBLIME TEXT 3

In order to write code we you use a program called a text editor, Sublime text 3 is one of the easiest to use text editors out there, plus its free!

2

FILEZILLA

When you are done writing code you would load that code up to a server (where all code goes, some call it the cloud) We do that using FileZilla.

3

FIRE BUG

Firebug lets you change websites on the fly without making it permanent, You can test changes to sites out. Imagine if you could do that with life!!

When you have a few minutes download these tools for your upcoming class. No worries if you don't know how to use them yet, that's what were here for :)

If you need help downloading them feel free to ask a mentor.
